Abstract:

JP 52070039 A

The edible packagings are prepd. by packaging foods with edible film, sheet or tube contg. spices and seasonings. On cooking the edible packagings the edible packaging material is either converted to a part of the foods or becomes seasoning or spice.

Used for packaging ham, sausage, dry noodle, hydrous noodle, hamburger, bacon, marine pasty food, cheese, fish, etc. and the kind of the packaging material is selected depending on the properties of foods to be packaged.

As edible film, sheet, tube, etc. those of collagen, casein, sodium casenate, gelatin, alpha-starch, amylose, dextran, etc. can be applied and among them a bicomponent film of starch and protein is excellent in moulding property, processing property, physical properties, etc. Spices and seasonings are scattered or dissolved in the film, and the film can be prepd. by a wet method or dry method.

As the seasoning 'miso', soy sauce, salt, sugar, sodium glutamate, margarine, etc. can be applied and as the spice pepper, garlic, vanilla essence, etc. can be applied.
